

THELAN

Transforming challenges into solutions
by driving innovation and order.
At Thelan, the world is our project.

IT SERVICE MANAGEMENT

Putting the right processes,
people, and technology in the
right place.

IT SYSTEMS MANAGEMENT

Structuring an effective plan to
allow employees to respond to
changing requirements and
facilitate the delivery of IT as a
service (ITaaS)

IT SERVICE MANAGEMENT

Minimizing risk and ensuring
business continuity in the event
of a data breach.

Advanced Technologies

Thelan provides a team of experts to create a sustainable, integrated plan that addresses your specific technology needs. From everyday maintenance to response in times of distress, Thelan is your go-to technology team.

ADVANCED TECHNOLOGIES

Thelan provides a team of experts to create a sustainable, integrated plan that addresses your specific technology needs. From everyday maintenance to response in times of distress, Thelan is your go-to technology team.

IT SYSTEMS MANAGEMENT

Thelan has experience assisting organizations in managing their hybrid IT Systems. Subsystems of this practice area include: application lifecycle, DevOps, cloud network, visualization, and asset lifecycle management. From government systems to Fortune 500 companies to startups, the Thelan team has years of experiences managing systems of all sizes to exceed client goals.

Protect yourself from reactive mistakes with a custom set of policies and procedures to systematically manage organizational data. Thelan's expert team will support you in data management, including in the event of a security breach or related interruptions. Specifically, the Information Security Management team will provide services through two subsystems: security information and event management and incident response management.

INFORMATION SECURITY MANAGEMENT

IT SERVICE MANAGEMENT

For each client, Thelan develops a custom strategic approach to design, deliver, manage, and improve IT within an organization. Every framework is created with specific business goals in mind. Specifically, Thelan has subsystems supporting: change management, compliance management, configuration management, automation management, cost management, data management, and help desk management.
